

Project Design Phase-II
Data Flow Diagram & User Stories

Date	7 July 2026
Team ID	XXXXX
Project Name	UNESCO World Heriatge Sites Analysis Using Tableau
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

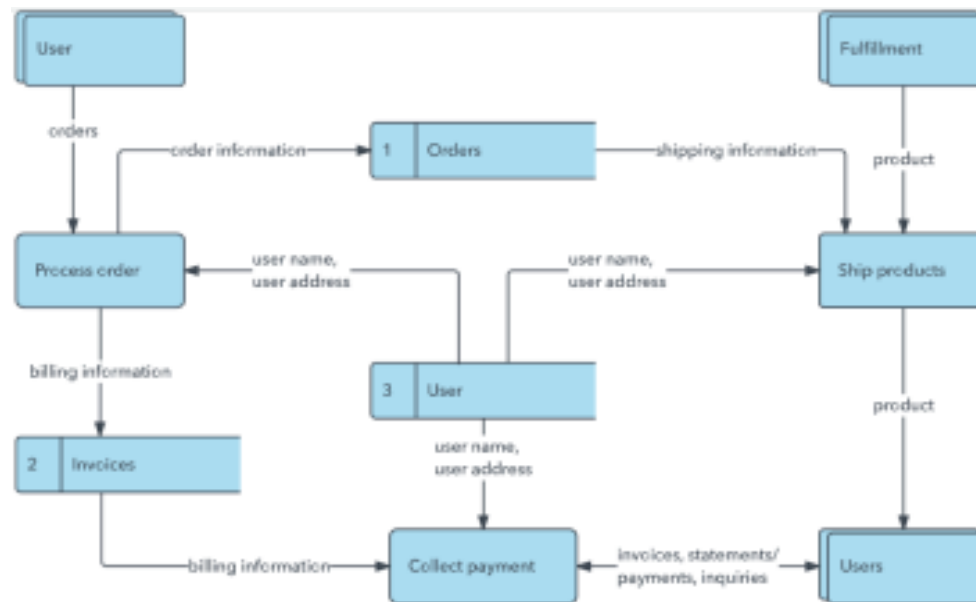

Example: [\(Simplified\)](#)

Example: DFD Level 0 (Industry Standard)

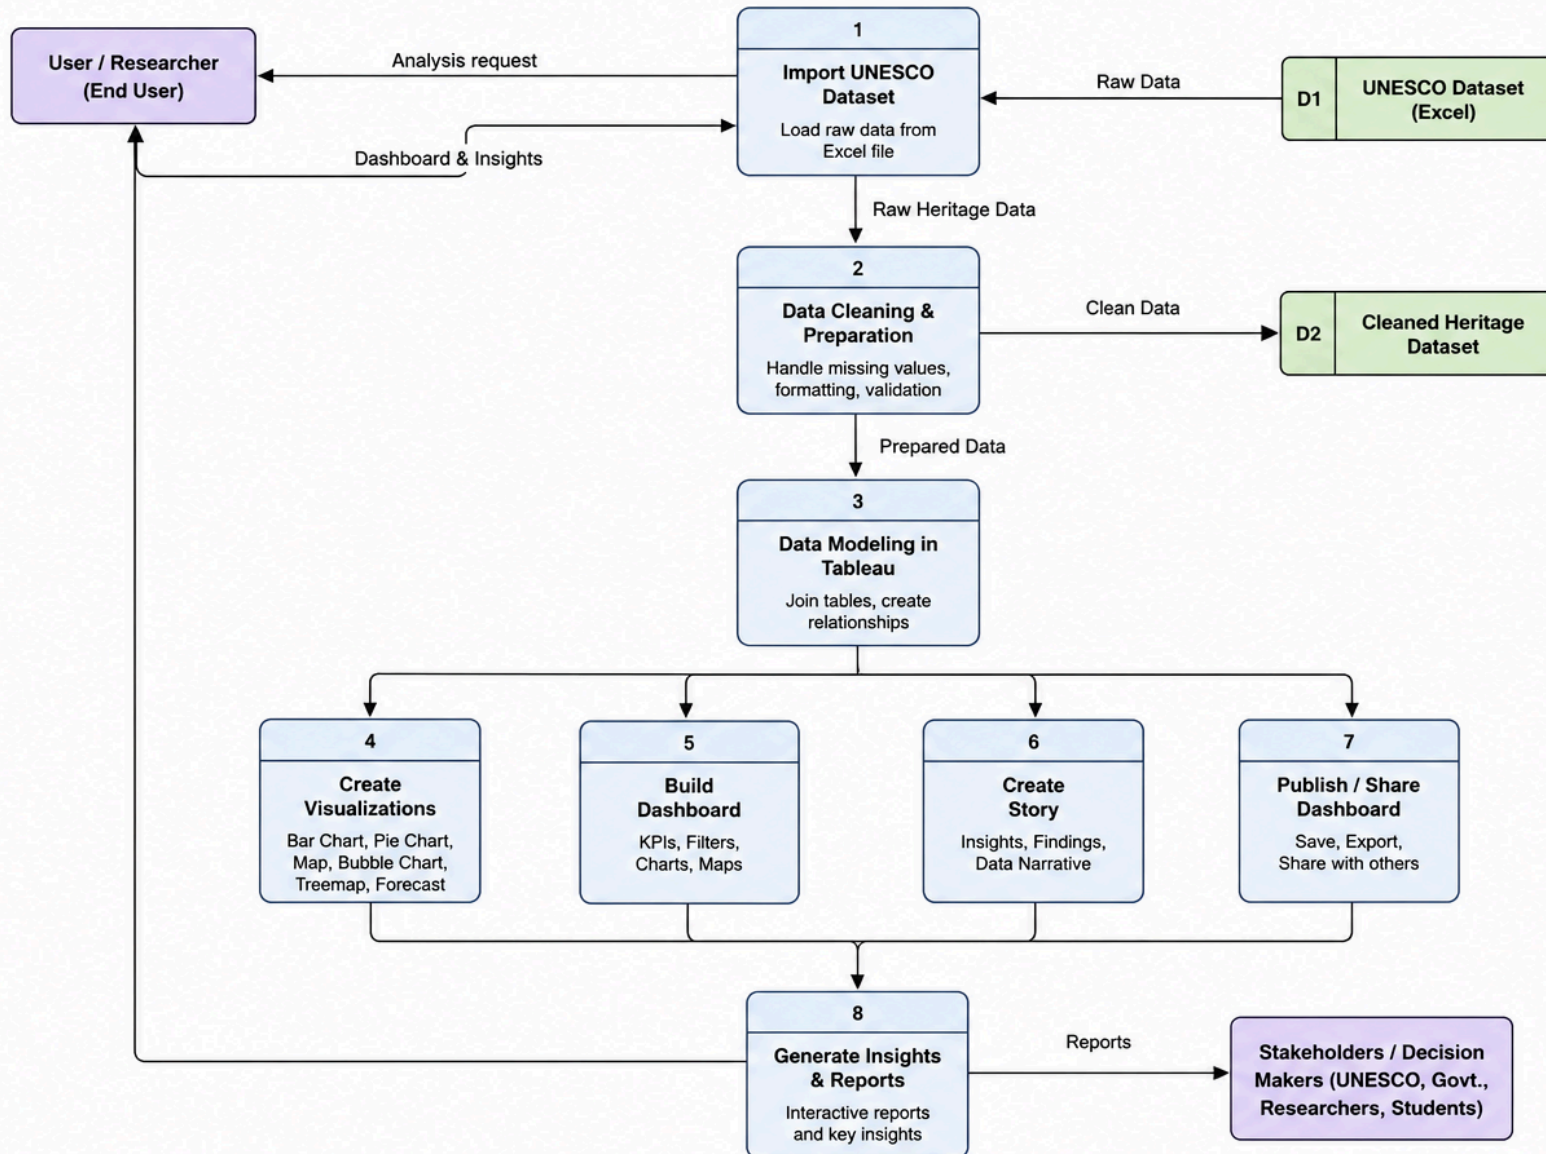

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the DS.js library.

DFD Level 0 – UNESCO World Heritage Sites Analysis Dashboard

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Researcher / Data Analyst	View Dashboard	USN-1	As a user, I want to open the Tableau dashboard so that I can analyze UNESCO World Heritage Sites.	Dashboard opens successfully and displays all visualizations.	High	Sprint-1
Researcher / Data Analyst	Filter Data	USN-2	As a user, I want to filter data by Region and Category so that I can perform focused analysis.	Filters update all charts correctly.	High	Sprint-1
Researcher / Data Analyst	Analyze Endangered Sites	USN-3	As a user, I want to identify endangered heritage sites so that I can understand conservation priorities.	Endangered sites are displayed correctly.	High	Sprint-1
Researcher / Data Analyst	Compare Regions	USN-4	As a user, I want to compare heritage sites across regions so that I can identify patterns and differences.	Comparison charts display accurate values.	Medium	Sprint-2
Researcher / Data Analyst	Forecast Analysis	USN-5	As a user, I want to view forecasting trends so that I can understand historical and future patterns.	Forecast chart is displayed correctly.	Medium	Sprint-2
Researcher / Data Analyst	View Story	USN-6	As a user, I want to navigate through the Tableau Story so that I can understand the analysis step by step.	Story points are accessible and display correctly.	Medium	Sprint-2
Decision Maker	Generate Insights	USN-7	As a decision maker, I want to use dashboard insights to support heritage conservation decisions.	Dashboard provides meaningful insights for decision making.	High	Sprint-3

Administrator	Update Dataset	USN-8	As an administrator, I want to update the UNESCO dataset so that the dashboard reflects the latest information.	Dashboard refreshes after data update.	Low	Sprint-3
