

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who will use the dashboard? 1.UNESCO Researchers 2.Data Analysts 3.Government Officials 4.Heritage Conservation Authorities 5.Students & Academics 6.Policy Makers	6. CUSTOMER CONSTRAINTS CC What prevents users from solving the problem? 1.Large dataset. 2.Limited visualization tools. 3.Time constraints. 4.Manual analysis effort. 5.Difficulty identifying trends. 6.Limited technical expertise.	5. AVAILABLE SOLUTIONS AS What existing solutions are available? 1.UNESCO official reports. 2.Microsoft Excel spreadsheets. 3.Static PDF reports. 4.Manual data analysis. 5.Government publications. 6.Research papers.	Explore AS, differentiate	
	2. JOBS-TO-BE-DONE / PROBLEMS J&P What problems do you solve? 1.Analyze UNESCO heritage site distribution. 2. ompare regions and categories. 3.Monitor endangered heritage sites. 4.Identify historical trends. 5.Generate reports for decision making. 6.Access insights quickly.	9. PROBLEM ROOT CAUSE RC Why does the problem exist? 1.Raw data is difficult to interpret. 2.No centralized dashboard. 3.Manual reporting process. 4.Large volume of records. 5.Limited interactive visualizations. 6.Difficult regional comparison.	7. BEHAVIOUR BE What do users do? 1.Load the dashboard. 2.Apply filters. 3.Compare regions. 4.View maps and charts. 5.Analyze endangered sites. 6.Export insights. 7.Present findings.		Focus on J&P, tap into BE, understand RC
	3. TRIGGERS TR What causes users to use this dashboard? 1.Need for heritage site analysis. 2.Research projects. 3.Government reporting. 4.Conservation planning.	10. YOUR SOLUTION SL How does your project solve it? 1.Imports UNESCO heritage data. 2.Cleans and organizes the dataset. 3.Provides interactive charts and maps. 4.Displays KPIs and forecasts. 5.Supports filters for detailed analysis. 6.Presents findings through Tableau Story. 7.Enables faster and more accurate decision making.	8. CHANNELS of BEHAVIOUR CH Online: 1.Tableau Public 2.Web Browser 3.University Portal 4.UNESCO Website Offline: 1.Tableau Desktop 2.PDF Reports 3.PowerPoint Presentations 4.Local Excel Files		
4. EMOTIONS: BEFORE / AFTER EM How do users feel before and after? Before 1.Confused by raw data. 2.Time-consuming analysis. 3.Difficult to compare regions. 4.Hard to identify endangered sites. After 1.Clear understanding of data. 2.Faster analysis. 3.Better decision making. 4.Increased confidence in insights.
